## Atlantic Mobile Shoulder Pack for Remote HD Video

### FULL HD VIDEO ACROSS THE INTERNET

Video is data. The last few years brought us great advances in encoding, protocol optimization, and now bandwidth. Atlantic has integrated state-of-the-art products into a proven mobile solution for remote news gathering.

What's in the bag?

- High-performance Haivision encoder
- Zixi protocol optimizer
- Router with local flash/disk stream capture and 3G/4G/WiFi/wired connectivity capability, talkback, management interface
- Rechargeable lead-acid batteries
- Control tablet/touchscreen
- 7.6 lbs, 8.5" x 12.5" x 7.75"

You bring the camera!

### SUPER-FAST CODECS

The 'Makito' line provides remote HD/SD video

encoders in a small form factor for live feeds. Units support multiple interfaces, dual streams for high/low bandwidth delivery.

### STREAM OPTIMIZATION FOR INTERNET VIDEO

Zixi's patented stream optimization technologies remove overhead from IP connections and synchronize the endpoints against a common time-base. This allows you to broadcast real-time high definition video over a pedestrian connection. Who needs that? Everyone considering simulcasting a live event in real-time—debates, graduations, sporting events, theater, remote classrooms. Coupled with Haivision's fast encoders, Zixi enables commercial grade, real-time HD everywhere.

### YOU WANT TO DO BUSINESS WITH US

ATLANTIC

Computing Technology Corporation

Video used to be about analog technologies, RF and broadband modulation. It has become data, much the same way that photography and music have become data. Data is for IP network folks—not so much for the cable guy. We're IP network specialists: we've been providing IP data connectivity expertise for almost two decades, including layer-2 and layer-3 redundancy planning, wide area networking and IP infrastructure, wireless and security.
